# Nomura Technology and Service

## Start here for your global solutions

### A global-minded company:

Nomura aims to meet various needs of the customers around the world by offering our products with our delicate service. We always seek the satisfaction of our customers around the globe through meeting diverse needs of our customers while seeking to optimize <specifications> for manufacturing conditions, studying <mechanism of manufacturing> to meet diverse needs, and constructing a flexible <production system>. That's what Nomura technologies and service are all about.

### Always in progress:

As technology advances and environmental requirements become more pressing, the fastener industry and threading tools face an accelerating change. For example, besides the requests for functional features and high strength, the products must meet various requirements, such as light-weight to save energy and recyclability. Thus, we must always research and develop new products and offer sophisticated service for changing needs of our customers.

## Faithful to core values of manufacturing:

As a manufacturer, Nomura embraces three core values, Quality, Cost and Delivery. Quality is aimed to be well above customer requirements. Cost management covers total cost reduction for customers. Finally, Just-In-Time Delivery is achieved by our constant efforts. These are part of our devotion to make our customers ever happier. Through best services and technologies, our taps touch the lives of billions of people around the globe. These are our goals and hopes....as always, as ever.

## NOMURA'S Net Work

Nomura's international network ensures prompt delivery of the products renowned around the world for quality. Thanks to an international network now covering some 20 countries, Nomura guarantees access to the quality products your company needs. No matter where you are, Nomura delivers the same superior technology enjoyed by our customers in Japan
